Room 2 News

Room 2 have recently been learning how to combine their knowledge of well known stories with their own experiences and imaginations. Some days they were thinking up their own creative endings to classic fairy tales and other days they were interviewing the Big Bad Wolf for a newspaper article. The students really enjoyed being able to experiment with different ideas in conjunction with the use of different media and devices.

Below is one of the 'WANTED' posters that were completed during last week. The artist is Ata Mischewski.

Room 3 News

Welcome to week 7. This week we are trying to catch up on work that has not been completed so we are ready for our next Inquiry Unit. In our writing we have been focusing on P.E.E.L (Point.Explanation.Evidence.Link) paragraphs.

EARTH JUNK

Earth Junk is waste that we throw out, whether it's empty or not. This is causing: pollution, global warming, landfill and climate change. These issues are a major crisis to us, especially to the poor because they get only little shelter and food.

Pollution and global warming is a water type - greenhouse gas and it's also the worse problem we could ask for. It's affecting our sea animals and our land. This gas is melting the glaciers, which are killing our seals. It is also melting ice which is taking over land from different countries. Landfill is causing greenhouse gas to the air we breathe in.

I feel devastated about these issues and how the effect they are having on the earth and there is also space junk around the earth. I think we should all pick up rubbish because it could save 4 million pieces from going into the sea and prevent the sea from taking over our land.
